ABOUT

I am a hard-working and motivated individual with experience working in fast-paced environments. I'm **currently looking to transition into a career in front-end development** and am eager to continue learning new front-end technologies, and apply my skills in a professional setting. **I have previous programming experience** (developing ML algorithms with Python), and I am confident in my ability to quickly learn and apply new technologies.

WORK EXPERIENCE

Operations Executive

On Device Research

Jan 2021 - Dec 2022

- **Developed and deployed Python scripts to automate tasks involving large datasets** for the management team, improving time efficiency by more than 3x.
- **Created JavaScript applications to automate weekly reports using Google App Scripts.**
- **Worked with the UX team to explore user journeys, to help develop and improve internal company software tools.**
- Strategically coordinated over 30 live projects at any given time to ensure they were delivered on time and with a high profit margin.
- Applied problem-solving, process development, and strategic implementation skills to support all areas of the operations pipeline.

Logistics Analyst Intern

Greco International

Jan 2020 - Dec 2020

- **Developed Python scripts to automate daily tasks, eliminating human error and improving time efficiency by more than 10x.**
- Worked in a team to analyze blueprints and technical documents relating to locomotives to develop JIT (just-in-time) production strategy, thereby minimizing delivery times and storage costs within the production process.
- Cross-checked and carried out in-depth analysis of quotes from various suppliers to maximize revenue in line with manufacturing strategy.
- Completed paperwork, recognizing discrepancies and promptly addressing for resolution.
